

Revealed... South America's Weight Loss Secret...

For Those People Who Want To Lose Weight (And Keep It Off Forever More) But Have Never Managed To Do So

Could this fat burning Amazonian Rainforest plant be the answer to wearing a smaller dress size or pair of jeans without dieting or exercising...?

**Best bit: Burn excess weight AWAY
with your own FREE 30 Day supply**

Dear Friend

If you're at all remotely interested in discovering how an amazing South American plant, widely used by locals to **burn fat naturally, easily lose pounds and inches**...and best of all keep it off forever more, while still *enjoying your favorite meals*...then ...

...It's very important you read every word on this website.

Here's why;

Deep in the South American Rainforest there grows an evergreen shrub, with holly-like, leaves which possess a multitude of health benefits among them – very importantly - **weight loss properties**...and...perhaps...**the key to you having a leaner body**.

So you can...

- **Burn up your stored fat**...even...when you're not trying to diet.
- **Naturally suppress your appetite** so you're not tempted to snack between meals.
- **Boost your energy levels** by **revving up your metabolism** which means you burn fat and calories, and have more *get-up-and-go*.
- **Increases the transit time of your food through** your digestive tract so you feel fuller for longer.

And more importantly...Makes you look great in your little back dress...sees your husband thinking how **"Hot"** you look whenever he glances in your direction... gives you the confidence to make love with your bedroom LIGHTS ON...boosts your self-esteem ...and...makes you feel comfortable with your body when you're out socializing...

You see, as far back as the 16th century Spanish explorers reported the Guarani natives of the Rainforest drank a leaf tea which produced “*exhilaration and relief from fatigue.*” And since then the locals have used **Yerba Mate** (pronounced yerba mah-tay) - as a safe, natural fat burner.
